

## PICO QUENCH GUARD Biostable Cutting Table Coolant and Corrosion Inhibitor

PICO QUENCH GUARD is an environmentally compliant and biostable water-based coolant and rust and corrosion inhibitor for use in water jet and other cutting table systems.

PICO QUENCH GUARD regular use cools and quenches cutting surfaces, helps keep nozzles clean and free from build-up and protects ferrous and non-ferrous machinery components and processed parts from rust and corrosion for extended periods.

PICO QUENCH GUARD is biologically stabilized to help prevent odors and bacteria from building up in water-based systems.

PICO QUENCH GUARD is a non-discernible, non-tacky, non-staining, and easy-to-use solution that exhibits comprehensive surface coverage for improved metal cutting, appearance, quality, and protection.

PICO QUENCH GUARD does not contain oil or petroleum solvents, heavy metals, wax, silicone, or nitrites and is non-toxic, non-hazardous, and non-flammable.

PICO QUENCH GUARD is recommended to be used in economical dilutions of 5% (by volume) of the cutting table water tank for normal protection. The solution drops fines rapidly, exhibits excellent stability, and helps provide a long, reusable tank life in properly maintained systems.

PICO QUENCH GUARD facilitates post processing and handling and does not need to be removed before picking, painting, or welding (has no adverse effect to weld integrity or atmosphere) and produces good integral bonding.

PICO QUENCH GUARD solutions will not degrade and do not require special handling.

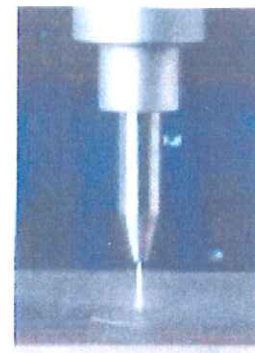

PICO QUENCH GUARD offers a wide range of dilution versatility and use (in all waters), depending on the application and system being utilized.

PICO QUENCH GUARD also benefits welders, job shops, metal fabricators, tank manufacturers, machining centers, and others with "in-process" applications.

PICO QUENCH GUARD is available as a green-colored (easily identifiable) solution (PICO QUENCH GUARD G) and as a clear, amber-colored solution (PICO QUENCH GUARD C).

PICO QUENCH GUARD is available in pails, drums, totes, and bulk containers.

PICO also offers other cutting table / machining / welding products: freeze control fluid additives, mist coolants, welding anti-spatter fluid, and cleaners.
