## PICO SOLV NPB Environmentally Compliant Solvent Cleaner / Degreaser

**PICO SOLV NPB** is a unique, chlorine-free solvent cleaner designed as a direct "green" replacement for tri-chlor, perchlor, and other more hazardous cleaning solvents such as mineral spirits, xylene, MEK, toluene, and alcohol. This value-enhanced, clear fluid was developed to meet industry's need for environmentally responsible (non-ozone depleting) and non-hazardous solvents with complete and improved solvency performance for various cleaning applications to remove organic soils and other soils.

**PICO SOLV NPB**, when used as received, efficiently removes cutting, machining, lubricating, stamping, and mill-applied oils as well as greases and protective waxes and other soils.

**PICO SOLV NPB** evaporates quickly, has no flash point, is chemically stable, leaves no films or residues, and is easy to use.

**PICO SOLV NPB** eliminates cleaning problems in a variety of metalworking plants, metal service centers, coil processors, fabricating, finishing facilities, and rebuild shops. Typical applications include oil removal from screw machined parts, dirty electrical components, oxygen service cleaning, and coil-to-coil metal cleaning.

**PICO SOLV NPB** is compatible with most metals, plastics, and space-age materials and is inhibited against white metal staining and corrosion.

**PICO SOLV NPB** does not contain petroleum solvents, chlorinated compounds, or water and is easily used in vapor degreasers, ultrasonic agitators, dip tanks, enclosed or hand spraying systems, or by wiping.

**PICO SOLV NPB** is a stabilized azeotropic mixture that may be distilled many times and has good wetting characteristics to evenly coat surfaces, thus releasing its full power solvency to penetrate and dissolve oil and grease films.

**PICO SOLV NPB** is highly recommended for cleaning and flushing liquid or gaseous oxygen (service) systems and their components, medical devices, electronics, high-vacuum, and optic components, and is fast drying.

**PICO SOLV NPB** is available in gallon, pail, drum, tote, and bulk containers.

**PICO Chemical Corporation** is an ISO 9001:2008 certified manufacturer of value-enhanced specialty chemicals and lubricants to clean, condition, lubricate, and protect metalworking, metal finishing, and metal processing applications since 1976.
