

PICOCLEAN X-RUST pH Neutral Rust Remover

PICOCLEAN X-RUST is an environmentally friendly and non-hazardous "pH neutral" rust remover that can eliminate downgrading or scrapping steel parts. This unique, value-enhanced and safe-to-use water-based chemical was developed to restore steel parts tarnished by rust, scale, or oxidation during processing, storage and/or transit.

PICOCLEAN X-RUST is easy to use, highly effective, economical, and provides a complete and comprehensive rust removal even from the hardest-to-reach areas of metal surfaces.

Uncoated steel products can be subject to high humidity, water condensation, longer-than-normal storage times and corrosive atmospheres that attack bare steel. When steel gets rusty, it is often downgraded, scrapped, mechanically cleaned or cleaned with hazardous chemicals, which can be unsafe, expensive, time consuming, and adversely impact a manufacturer's productivity and profit. PICOCLEAN X-RUST eliminates these problems by providing a rust-free and protective steel surface in a fast and safe-to-use single cleaning.

PICOCLEAN X-RUST temporarily passivates ferrous surfaces and does not need to be removed prior to post process operations such as cleaning, painting, or welding.

PICOCLEAN X-RUST is non-toxic, does not contain harsh acids or caustics, and mixes easily and economically with all waters for use by immersion or in ultrasonic tank equipment (wipe on-wipe off for light surface rust removal). Removal times depend on concentration, agitation, temperature, and the severity of the steel's corrosion and surface condition.

PICOCLEAN X-RUST BENEFITS:

- Odorless
- Fast acting
- Safe on all ferrous alloys
- Rust particles settle for easy removal
- Operator and environmentally friendly
- Provides temporary corrosion protection

PICOCLEAN X-RUST is available in gallons, pails, drums, and tote containers.
