

PICO GUARD 17625 Water-based Corrosion Inhibitor

PICO GUARD 17625 is an environmentally friendly corrosion inhibitor that can help companies increase sales and productivity by eliminating the downgrading or reprocessing of corroded metal parts and protecting machinery components. This unique value-enhanced, water-dilutable chemical does not contain oil or solvents and was developed to meet demanding industrial requirements for the temporary indoor protection of steel, and non-ferrous metal parts and machinery.

PICO GUARD 17625 is easy to use, adaptable for "in-process" applications, highly effective, has no flash point, and provides metal manufacturers and steel processors with a safe method for protecting metal.

PICO GUARD 17625 mixes easily with plant water, typically at economical concentrations from 5% to 25%, depending on the length of protection required.

PICO GUARD 17625 is normally applied by spray or immersion at room temperature and may be air dried to extend protection times.

PICO GUARD 17625 is nitrite free and does not contain heavy metals or wax, forms a clear solution, is easily cleaned, and does not leave tacky residues.

PICO GUARD 17625 facilitates post processing and handling and does not need to be removed before pickling, painting, or welding (has no adverse effect to weld integrity or atmosphere) and produces good integral bonding.

PICO GUARD 17625 is safer to use than oil or solvents and provides long, economical tank life.

PICO GUARD 17625 use can also benefit job shops, metal fabricators, fastener manufacturers, machining centers, aluminum producers, tank manufacturers, welders, and others with "in-process" cleaning units.

PICO GUARD 17625 is available in pails, drums, tote, and bulk containers.

PICO Chemical Corporation is an ISO 9001:2008 certified manufacturer of value-enhanced specialty chemicals and lubricants to clean, condition, lubricate, and protect metalworking, metal finishing, and their related processes since 1976.
