

PRODUCT DATA

PICOLUBE SPL

Environmentally Compliant Rail Track Lubricant

An environmentally compliant synthetic lubricant designed to provide a thorough lubrication of railroad switches (manual and power), slide plates, track rails, couplers, crane rails, and related moving applications.

Value-added "stay put" technology reduces material run off; reduces friction and wear while improving lubrication and coverage in areas that need to retain lubrication for extended periods.

A long-lasting, stable lubricant that will not separate or thin out under severe service and variable temperature conditions and does not attract dust, dirt, harden or wash off by rain or snow.

Safe to use, operator friendly, biodegradable and at the same time provides environmental compliance.

Is non-VOC.

Use "as received" by spray, pump feed, brush or flow-on methods in all applications, including vertical, inclined, and horizontal areas.

Flows easily at all temperatures, is inhibited against oxidation; provides excellent lubricity, rust and corrosion protection, and is non-staining.

HIGHLIGHTS

- Biodegradable
- Low use concentration
- Does not contain graphite
- Repels moisture / wash off
- Non-conductive / non-corrosive
- Long lasting / reduces applications
- Protects against wear (reduces friction)
- Non-staining
- Thorough lubrication
- Environmentally friendly
- Reduce maintenance costs
- Prevents rust and corrosion
- Variable temperature performance
- Use on vertical / inclined / horizontal surfaces

PICO solutions help improve productivity, performance, quality, and environmental compliance.

PICO Chemical Corporation is an ISO 9001 certified manufacturer of specialty chemicals and lubricants to clean, condition, lubricate, protect, and provide value for steel producing, metalworking, metal finishing, metal processing, metal fabrication, and their related industrial applications worldwide since 1976.
