

# PLASMA CUTTING / BURNING TABLE SPECIALTY PRODUCTS

Performance proven, environmentally friendly products designed for use in plasma, oxy, and dry cutting systems and CNC machining systems.

## PICO QUENCH GUARD G

A green-colored plasma, oxy, and cutting table coolant, fluid conditioner, and rust and corrosion inhibitor for use on mild steel, stainless, and aluminum surfaces.\* Long-lasting solution life.

## PICO QUENCH GUARD 55

A blue-colored plasma and oxy cutting table / machining center coolant, conditioner, and rust inhibitor with excellent lubricity for cutting, drilling, tapping, etc., on ferrous, stainless, aluminum, including Inconel, titanium, galvanized, Galvalume, zinc coated, brass, and other alloys.\* Improves tool and solution life.

\* Note: **PICO QUENCH GUARD G** and **PICO QUENCH GUARD 55** are formulated to cut aluminum with plasma, when proper table control, concentration ratios, fluid levels, and safety measures are followed and maintained.

## PICOCLEAN WTC

A multipurpose cleaner for use in plasma, oxy, and waterjet tables and machining centers.

## PICO PTC 730

A "universal" plasma torch coolant designed for plasma cutting, TIG, and MIG welding torches in recirculating and resistance welding systems. Safe on mild steel, brass, aluminum, and stainless metals.

## PICO THERMAL HTF 100

A freeze control additive added to **QUENCH GUARD** fluids for plasma, oxy, and waterjet cutting tables operating in temperatures below 40°F (4°C).

## PICO SLAT COATER

An highly effective coating for long-term protection from slag and spatter buildup on cutting table slats, downdraft side walls, and additional table equipment.

## PICOTREAT SUPER SUMP CONDITIONER

A highly effective additive designed to maintain and extend product functionality and increase the life of metalworking fluid solutions which may be subject to abnormal odor, bacteria, and stability problems.

Contact PICO for additional information on each product of interest.
